Name: Everest Poker

Country: Kahnawake (Canada)

Established: 2002

Software: 6.2 MB

Everest poker is a very popular online poker room among the European poker players. This poker room is not as large as Party Poker or Poker Stars but it is beyond the average with some awesome ongoing promotions, and the brand new loyalty program called Summit Points.

Software

The software is very good with excellent graphics. It is not plain like Titan poker, and it is presented from a 3D perspective. The lobby is also great. You find all filter you need.

Traffic

Around 4000 players join the poker site in peak hours and this is just enough to experience some quality poker action.

Game Variety

If you do not play Texas Hold'em than this poker room is not for you. Game types like Omaha, 7 Card stud or Draw poker are missing. Everest poker is all about Texas Hold'em. This may be a plus for texas holdem players because all online players will join the holdem tables.
